

Wiefferink B.V. with its head office in the Netherlands (Oldenzaal) is one of the leading European specialists in developing, manufacturing and installation of flexible storage & cover solutions made from foil. Our own research & development department is continuously working on innovations and new production techniques leading to new solutions and products based on our customer needs.

Wiefferink has more than 60 years of experience in the world wide fields of biogas, agriculture, waste water treatment plants and industry. Our high quality, craftsmanship and highly motivated work force has given us a worldwide reference list. Wiefferink has realized many projects in the renewable energy industry (biogas covers, domes) and agricultural markets (silo covers and pillow tanks) for manure or all kinds of other residues.

For (the French market) southern Europe we have a position for a:

Sales Engineer/Sector Manager

Biogas, Agriculture, Waste water treatment plants and Industry

What will be your responsibility:

- Build a network of trusted distributors, tank manufacturers, biogas companies etc.
- Fulfilling a bridge function between your partner and end-user network and the Wiefferink organization.
- Sales for the Wiefferink range of products in different markets.

Profile:

- Existing network in biogas/agriculture/WWTP industry.
- Fluently in French & English (verbal and in writing).
- Good technical and commercial skills.
- Experience with technical textiles is preferable.

You will be working in an experienced and professional organization, you will report to the commercial director.
